

Kweichow Moutai Co., Ltd. | SH | 600519

Financial performance and cash value

This report connects reported profitability and cash conversion with transparent reinvestment and equity-bridge assumptions. The base case gives CNY 722.44 per share, compared with the dated close of CNY 1,258.62. These are conditional DCF values, not an investment rating.

Key takeaways

- Latest annual revenue CNY 172,054.2 million; EBIT margin 66.3%; parent net margin 47.8%. Fiscal end 2025-12-31.
- Parent ROE 34.5%; CFO / parent profit 0.75x. Scope-matched average parent equity supports the DuPont identity.
- Dated close CNY 1,258.62 on 2026-09-30. FX 1.000000 CNY per CNY, dated 2026-09-30.
- Bull CNY 912.15, base CNY 722.44, bear CNY 559.34 per share; base upside / downside -42.6%.
- WACC 10.0%; perpetual growth 2.0%; stable ROIC 12.0%; terminal / EV 68.6%. Operating reserve CNY 17,205.4 million is an explicit assumption.

Financial feeds, operating-profit definitions and forecast assumptions require issuer-filing review. The report does not establish verified fair value. Annual balances and shares are frozen; subsequent distributions, financing and dilution are not automatically bridged.

Public-data research draft

Observed figures and calculated values are distinguished from generic scenario assumptions. No assured target price is assigned.

Security / valuation	Value
Ticker	600519
Analysis date	2026-10-03
Dated close	CNY 1,258.62
Base DCF	CNY 722.44

Bear / bull	559.34 / 912.15
WACC / g	10.0% / 2.0%
Terminal / EV	68.6%

Snapshot dates

Annual anchor 2025-12-31; stock close 2026-09-30.
Reporting currency CNY; trading currency CNY.
Current balances are not implied.

Bridge proxies

Cash and recognized short investments less operating reserve, debt, senior claims and book NCI. Unrecognized long-term stakes require separate review.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Why profitability and cash conversion changed

The packet shows revenue rising through 2024, then declining to CNY 172,054.2 million in 2025 from CNY 174,144.1 million in 2024 [F03][F04]. EBIT margin was stable around 67.7-67.9% from 2022 to 2024, then eased to 66.3% in 2025 [F01][F02][F03][F04]. Parent net margin followed a similar path, while parent ROE fell to 34.5% in 2025 from 38.4% in 2024 [F03][F04]. Cash conversion, measured by CFO/parent profit, improved from 0.59x in 2022 to 1.07x in 2024 before weakening to 0.75x in 2025 [F01][F02][F03][F04]. The packet lacks segment, order, product, price, or cost-line evidence, so we cannot confidently attribute the margin and cash-conversion shifts to demand, pricing, mix, AI, or cost controls. Evidence that would distinguish these explanations includes disaggregated revenue by product/segment, volume and price data, order backlog, cost breakdowns, working capital line items (receivables, inventory, payables, deferred revenue/contract liabilities), and a cash flow statement reconciliation. The trade NWC proxy omits prepayments, contract assets and customer advances, and vendor operating-profit definitions may include investment or finance items, requiring filing reconciliation [L01]. Secondary feeds remain unverified [L01]. Without that evidence, the observed changes are descriptions, not causal attributions.

Evidence and calculation references

[F01] to [F04] identify chronological annual periods in the appendix.

[C01] Calculated DCF values and price comparison. [A01] Explicit assumptions and equity bridge.

[X01] Dated currency conversion. [L01] Source, accounting and model limitations. Full field references are retained in the evidence package.

How cash allocation, reinvestment and valuation assumptions affect value

The DCF is an explicit assumption, not a forecast [C01]. The base value is CNY 722.44/share, bull CNY 912.15/share, bear CNY 559.34/share, versus a close of CNY 1,258.62/share on 2026-09-30; base upside is -42.6% [C01]. Because the base DCF is below the close, the model implies a discount to market value, not a premium [C01]. Terminal EV is 68.6% of value, so terminal assumptions are material [C01]. The model uses WACC 10.0%, perpetual growth 2.0%, stable ROIC 12.0%, revenue growth -1.2%, EBIT margin 66.3%, tax rate 25.7%, D&A ratio 1.3%, capex ratio 1.8%, and NWC ratio 33.4% [A01]. Scenario policy adjusts growth, margin, capex and NWC ratio [A01]. Cash allocation and reinvestment affect value through the annual bridge: cash CNY 51,690.6 million, investments CNY 0.0 million, operating cash reserve CNY 17,205.4 million, debt CNY 233.7 million, NCI CNY 9,321.4 million, and shares 1,252.270 million [A01]. However, these are frozen annual balances [L01]. Investments default to zero as policy, not fact [L01]. NCI is deducted at book value, not fair value [L01]. Post-anchor dividends, buybacks, financing and dilution are not bridged [L01]. Reporting and quote currency are both CNY at 1.000000 [X01]. Scenario values are assumptions, not probabilities or share-price forecasts [C01]. The net bridge is CNY 19.91/share [C01], but it does not offset these limitations.

Evidence and calculation references

[F01] to [F04] identify chronological annual periods in the appendix.

[C01] Calculated DCF values and price comparison. [A01] Explicit assumptions and equity bridge.

[X01] Dated currency conversion. [L01] Source, accounting and model limitations. Full field references are retained in the evidence package.

Issuer scope and reporting comparability

The selected security is Kweichow Moutai Co., Ltd., SH 600519. The report uses 4 annual observations; it does not substitute a parent group or another listing.

SEC-matched periods use actual filing fiscal ends. Other observations retain the vendor period and source status. Publication cutoffs, restatements, mergers and accounting definitions require issuer reconciliation; no uninterrupted economic perimeter is inferred from availability alone.

Parent-attributable profit and average parent equity are matched for ROE. Consolidated operating cash flow / parent profit is a diagnostic comparison, not a scope-matched accounting identity.

Issuer identifiers

Version discipline

Snapshots retain original values, field references, URL provenance and response hashes. Missing data stays unavailable. Source status is not upgraded merely because arithmetic passes.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Profitability cash conversion and DuPont

Profit margin, cash conversion and balance-sheet returns answer different questions. Parent ROE uses parent-attributable profit and average parent equity; the three-factor identity uses matching balances throughout. Missing opening balances remain unavailable.

Metric	2022-12-31	2023-12-31	2024-12-31	2025-12-31
Revenue growth	Not available	18.0%	15.7%	-1.2%

Five year operating forecast

Forecasts are explicit assumptions, not management guidance. The model projects the issuer in aggregate; there is no verified segment, product or order forecast in this packet. The first annual FCFF is prorated to the days remaining after the analysis date.

Base drivers / forecast	2026E	2027E	2028E	2029E	2030E
Revenue	169,989.4	169,037.3	169,172.4	170,390.4	172,707.7
EBIT margin	66.3%	66.3%	66.3%	66.3%	66.3%
EBIT	112,703.5	112,072.3	112,161.9	112,969.4	114,505.8
Operating tax rate	25.7%	25.7%	25.7%	25.7%	25.7%
D&A	2,211.9	2,199.5	2,201.3	2,217.1	2,247.3
Capex	3,090.1	3,072.8	3,075.2	3,097.4	3,139.5
Trade NWC proxy	56,733.6	56,415.8	56,460.9	56,867.4	57,640.8
Full year FCFF	83,596.0	82,760.3	82,463.3	82,696.0	83,459.3

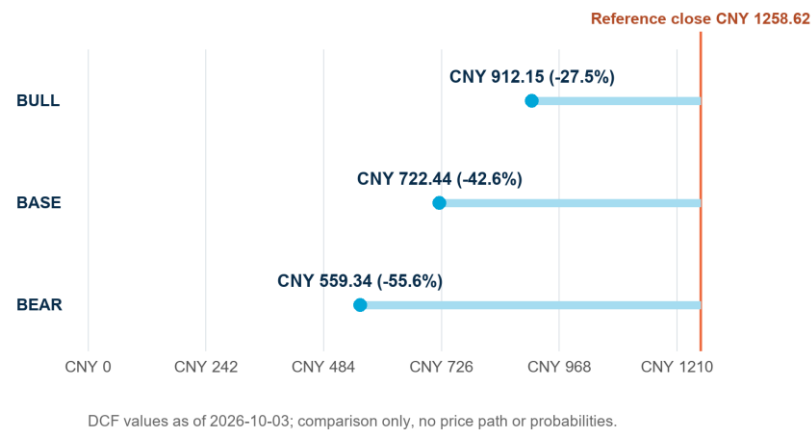

Initial growth -1.2% fades toward perpetual growth. Historical D&A / revenue 1.3%, capex / revenue 1.8% and trade NWC / revenue 33.4% are mechanical drivers unless explicitly overridden. Vendor EBIT requires accounting reconciliation before interpretation as core operating profit.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

DCF comparison | Three operating scenarios

BASE DCF CNY 722.44

FCFF / WACC as of 2026-10-03. Five explicit years and normalized terminal reinvestment.

Connections compare values with the dated close. No price path or scenario probability is assigned.

Shared valuation inputs

Assumption	Value
WACC	10.0%
Perpetual growth	2.0%
Stable ROIC	12.0%
Stable tax	25.7%
Base stable margin	66.3%
TV / EV	68.6%

WACC and stable ROIC are explicit assumptions. Terminal share measures sensitivity; it does not validate forecast accuracy.

Operating cases

BULL CNY 912.15

DCF / close -27.5%

Growth is base plus 5 percentage points; margin plus 2 points and NWC ratio minus 1 point.

2030E revenue 220,385.9m; EBIT margin 68.3%. Stable margin 68.3%.

BASE CNY 722.44

DCF / close -42.6%

Recent growth fades toward perpetual growth. Margin, D&A and reinvestment ratios follow the disclosed base assumptions.

2030E revenue 172,707.7m; EBIT margin 66.3%. Stable margin 66.3%.

BEAR CNY 559.34

DCF / close -55.6%

Growth is base minus 5 points; margin minus 3 points, capex ratio plus 0.5 point and NWC ratio plus 2 points.

2030E revenue 133,663.0m; EBIT margin 63.3%. Stable margin 63.3%.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Other Senior Claims	0.0						
Nci	9,321.4						
Non Operating Assets	0.0						
Shares	1,252.270215						
Equity value	904,693.7						
CNY / share	722.44						

Sensitivity in CNY/share. Centre equals the base model. Other operating and bridge assumptions are held fixed.

Reporting currency CNY; quoted currency CNY. Conversion uses 1.000000 CNY per CNY, dated 2026-09-30.

Cash and recognized short investments enter the bridge after the operating reserve. Debt, senior claims and NCI are deducted once; additional non-operating asset recognition is a separate explicit policy.

NCI is a book-value proxy. Annual cash, debt and shares are frozen unless overridden. Subsequent distributions, buybacks, financing, dilution and changes in investment fair value are not automatically bridged.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Historical financial appendix

CNY million	2022-12-31	2023-12-31	2024-12-31	2025-12-31
Revenue	127,554.0	150,560.3	174,144.1	172,054.2
Reported operating EBIT	86,544.1	101,958.2	118,276.3	114,072.5
Parent net income	62,717.5	74,734.1	86,228.1	82,320.1
Cash from operations	36,698.6	66,593.2	92,463.7	61,522.2
Capital expenditure	5,306.5	2,619.8	4,678.7	3,127.6

Total assets	254,500.8	272,699.7	298,944.6	303,834.8
Parent equity	197,480.0	215,668.6	233,106.0	244,637.8
Cash equivalents	58,274.3	69,070.1	59,295.8	51,690.6
Recognized short investments	Not available	400.7	248.5	Not available
Debt / leases	443.8	323.7	425.9	233.7
NCI book balance	7,458.0	7,987.9	8,905.3	9,321.4
Ordinary shares million	1,256.2	1,256.2	1,256.2	1,252.3

Periods retain their fiscal dates and source definitions. Historical share units may retain pre-split observations and are not used to infer per-share growth. Unavailable fields are missing observations, not factual zero balances.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Method evidence and limitations

FCFF discounts operating cash flows at WACC; financial claims enter the equity bridge. Terminal cash flow normalizes reinvestment using growth / stable ROIC. WACC must exceed perpetual growth. The chart compares scenario values with a dated close, not a future price path.

Source ID	Kind / host	Retrieved
S1	secondary_public_feed / query1.finance.yahoo.com	2026-10-03
S2	secondary_public_feed / query1.finance.yahoo.com	2026-10-03
Secondary financial feeds are not independently verified against issuer filings; publication cutoff and restatement scope require review.		

Annual shares and bridge balances are frozen at the latest annual end, not assumed to be current. Corporate actions since that date require review.

Trade working capital proxy omits unavailable prepayments, contract assets and customer advances.

A report is a research draft with explicit assumptions, not a brokerage recommendation.

Separate investment recognition defaults to zero as an explicit valuation policy, not a factual zero balance.

Defaults are transparent scenario seeds, not analyst-validated fair-value assumptions: latest margin, capped recent growth fading to perpetual growth, historical D&A/capex ratios, 10% revenue operating reserve, 10% WACC and 12% terminal ROIC unless overridden.

Latest annual cash/debt/share balances are frozen unless explicitly overridden; subsequent dividends, buybacks, financing, dilution and interim results are not automatically bridged.

NCI is deducted at book value; unrecognized non-operating stakes, assets and senior claims may materially change value.

First future fiscal cash flow is prorated by days remaining; same-calendar-date fiscal forecasts approximate 52/53-week calendars. Stock-based compensation is not deducted separately and future dilution is not forecast.

Trade NWC uses receivables + inventory - payables - deferred revenue. Missing components are omitted; this proxy excludes other operating current balances. Vendor operating-profit definitions may include investment or finance items and require filing reconciliation before use as core EBIT.
