

NVIDIA Corporation | US | NVDA

Financial performance and cash value

This report connects reported profitability and cash conversion with transparent reinvestment and equity-bridge assumptions. The base case gives USD 92.08 per share, compared with the dated close of USD 233.95. These are conditional DCF values, not an investment rating.

Key takeaways

- Latest annual revenue USD 215,938.0 million; EBIT margin 60.4%; parent net margin 55.6%. Fiscal end 2026-01-25.
- Parent ROE 101.5%; CFO / parent profit 0.86x. Scope-matched average parent equity supports the DuPont identity.
- Dated close USD 233.95 on 2026-10-02. FX 1.000000 USD per USD, dated 2026-10-02.
- Bull USD 114.81, base USD 92.08, bear USD 71.87 per share; base upside / downside -60.6%.
- WACC 10.0%; perpetual growth 2.0%; stable ROIC 12.0%; terminal / EV 72.9%. Operating reserve USD 21,593.8 million is an explicit assumption.

Financial feeds, operating-profit definitions and forecast assumptions require issuer-filing review. The report does not establish verified fair value. Annual balances and shares are frozen; subsequent distributions, financing and dilution are not automatically bridged.

Public-data research draft

Observed figures and calculated values are distinguished from generic scenario assumptions. No assured target price is assigned.

Security / valuation	Value
Ticker	NVDA
Analysis date	2026-10-03
Dated close	USD 233.95
Base DCF	USD 92.08
DCF / close	-60.6%
Bear / bull	71.87 / 114.81
WACC / g	10.0% / 2.0%
Terminal / EV	72.9%

Snapshot dates

Annual anchor 2026-01-25; stock close 2026-10-02.
Reporting currency USD; trading currency USD.
Current balances are not implied.

Bridge proxies

Cash and recognized short investments less operating reserve, debt, senior claims and book NCI. Unrecognized long-term stakes require separate review.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Why profitability and cash conversion changed

Profitability improved through FY2024 and FY2025 before a modest pullback in FY2026. Revenue rose from USD 26,974.0 million in FY2023 [F01] to USD 130,497.0 million in FY2025 [F03] and USD 215,938.0 million in FY2026 [F04]. EBIT margin increased from 15.7% [F01] to 54.1% [F02] and 62.4% [F03], then eased to 60.4% [F04]; parent net margin reached 55.8% [F03] and 55.6% [F04]. Parent ROE was 91.5% [F02], 119.2% [F03] and 101.5% [F04], after FY2023 was unavailable [F01]. No management, segment, product, order, pricing or cost-line evidence is supplied, so the increase cannot be confidently attributed to AI, demand, mix, pricing or cost control; those are competing explanations, not established drivers.

Cash conversion weakened: CFO divided by parent profit was 1.29x in FY2023 [F01], 0.94x in FY2024 [F02], 0.88x in FY2025 [F03] and 0.86x in FY2026 [F04]. That ratio relates operating cash flow to parent profit, not consolidated EBIT, and the packet lacks cash-flow components needed to isolate the cause. Working-capital builds, higher cash taxes or timing differences could explain lower conversion, but none is verified. Stock-based compensation and other non-cash items require reconciliation before their effect can be inferred. A01 assumes a 22.5% trade-working-capital ratio, but that is a valuation input, not observed FY2026 cash flow; the proxy omits prepayments, contract assets and customer advances [L01]. Cash-flow statements, working-capital changes, tax and SBC disclosures, plus segment and order data would distinguish these explanations; none is supplied.

Evidence and calculation references

[F01] to [F04] identify chronological annual periods in the appendix.

[C01] Calculated DCF values and price comparison. [A01] Explicit assumptions and equity bridge.

[X01] Dated currency conversion. [L01] Source, accounting and model limitations. Full field references are retained in the evidence package.

Cash allocation, reinvestment and valuation assumptions

The annual bridge freezes cash at USD 10,605.0 million, investments at USD 51,951.0 million, debt at USD 11,040.0 million and shares at 24,304.000 million [A01]. The USD 21,593.8 million operating cash reserve is not distributable cash, and investments cannot be treated as immediately available liquidity without liquidity and tax review [L01]. The packet does not show dividends, buybacks or other allocations, so actual cash allocation cannot be inferred; post-anchor actions are not bridged [L01]. The net bridge is USD 1.23 per share [C01], but it is a modelled residual, not observed distributable value. Shares are frozen annually, not current, and do not capture dilution or buybacks [L01].

The DCF base is USD 92.08 per share versus a close of USD 233.95 on 2026-10-02, a 60.6% base downside; bull/bear values are separate assumptions [C01]. Terminal EV is 72.9% of value, so WACC, perpetual growth and terminal margin are material [C01]. A01 assumes 25.0% revenue growth, 60.4% EBIT margin, 10.0% WACC, 2.0% perpetual growth, 12.0% stable ROIC and 22.5% trade NWC; capex is 2.8% and D&A 1.3%. These are assumptions, not probabilities or forecasts. The positive NWC ratio means growth consumes cash through the trade proxy, while capex above D&A implies reinvestment. The model indicates a discount versus the close, not a small premium, but it remains assumption-driven and constrained by missing current balances and operating evidence [L01].

Evidence and calculation references

[F01] to [F04] identify chronological annual periods in the appendix.

[C01] Calculated DCF values and price comparison. [A01] Explicit assumptions and equity bridge.

[X01] Dated currency conversion. [L01] Source, accounting and model limitations. Full field references are retained in the evidence package.

Issuer scope and reporting comparability

The selected security is NVIDIA Corporation, US NVDA. The report uses 4 annual observations; it does not substitute a parent group or another listing.

SEC-matched periods use actual filing fiscal ends. Other observations retain the vendor period and source status. Publication cutoffs, restatements, mergers and accounting definitions require issuer reconciliation; no uninterrupted economic perimeter is inferred from availability alone.

Parent-attributable profit and average parent equity are matched for ROE. Consolidated operating cash flow / parent profit is a diagnostic comparison, not a scope-matched accounting identity.

Issuer identifiers

Version discipline

Snapshots retain original values, field references, URL provenance and response hashes. Missing data stays unavailable. Source status is not upgraded merely because arithmetic passes.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Profitability cash conversion and DuPont

Profit margin, cash conversion and balance-sheet returns answer different questions. Parent ROE uses parent-attributable profit and average parent equity; the three-factor identity uses matching balances throughout. Missing opening balances remain unavailable.

Metric	2023-01-29	2024-01-28	2025-01-26	2026-01-25
Revenue growth	Not available	125.9%	114.2%	65.5%

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Five year operating forecast

Forecasts are explicit assumptions, not management guidance. The model projects the issuer in aggregate; there is no verified segment, product or order forecast in this packet. The first annual FCFF is prorated to the days remaining after the analysis date.

Base drivers / forecast	2027E	2028E	2029E	2030E	2031E
Revenue	269,922.5	324,986.7	376,334.6	418,484.1	446,104.0
EBIT margin	60.4%	60.4%	60.4%	60.4%	60.4%
EBIT	162,983.8	196,232.4	227,237.2	252,687.7	269,365.1
Operating tax rate	15.1%	15.1%	15.1%	15.1%	15.1%
D&A	3,553.8	4,278.7	4,954.8	5,509.7	5,873.3
Capex	7,552.5	9,093.2	10,529.9	11,709.3	12,482.1
Trade NWC proxy	60,847.5	73,260.4	84,835.5	94,337.1	100,563.4
Full year FCFF	122,177.2	149,340.6	175,735.4	198,787.7	215,810.2

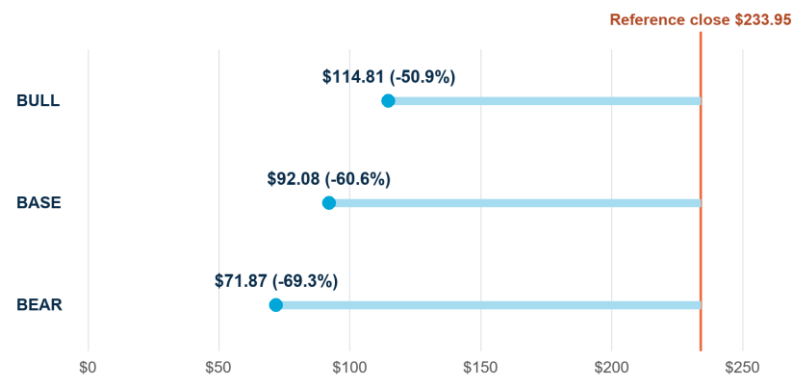

Initial growth 25.0% fades toward perpetual growth. Historical D&A / revenue 1.3%, capex / revenue 2.8% and trade NWC / revenue 22.5% are mechanical drivers unless explicitly overridden. Vendor EBIT requires accounting reconciliation before interpretation as core operating profit.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

DCF comparison | Three operating scenarios

BASE DCF USD 92.08

FCFF / WACC as of 2026-10-03. Five explicit years and normalized terminal reinvestment.

DCF values as of 2026-10-03; comparison only, no price path or probabilities.

Connections compare values with the dated close. No price path or scenario probability is assigned.

Shared valuation inputs

Assumption	Value
WACC	10.0%
Perpetual growth	2.0%
Stable ROIC	12.0%
Stable tax	15.1%
Base stable margin	60.4%
TV / EV	72.9%

WACC and stable ROIC are explicit assumptions. Terminal share measures sensitivity; it does not validate forecast accuracy.

Operating cases

BULL USD 114.81

DCF / close -50.9%

Growth is base plus 5 percentage points; margin plus 2 points and NWC ratio minus 1 point.

2031E revenue 551,451.4m; EBIT margin 62.4%. Stable margin 62.4%.

BASE USD 92.08

DCF / close -60.6%

Recent growth fades toward perpetual growth. Margin, D&A and reinvestment ratios follow the disclosed base assumptions.

2031E revenue 446,104.0m; EBIT margin 60.4%. Stable margin 60.4%.

BEAR USD 71.87

DCF / close -69.3%

Growth is base minus 5 points; margin minus 3 points, capex ratio plus 0.5 point and NWC ratio plus 2 points.

2031E revenue 357,498.4m; EBIT margin 57.4%. Stable margin 57.4%.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Other Senior Claims	0.0						
Nci	0.0						
Non Operating Assets	0.0						
Shares	24,304.000000						
Equity value	2,237,854.6						
USD / share	92.08						

Sensitivity in USD/share. Centre equals the base model. Other operating and bridge assumptions are held fixed.

Reporting currency USD; quoted currency USD. Conversion uses 1.000000 USD per USD, dated 2026-10-02.

Cash and recognized short investments enter the bridge after the operating reserve. Debt, senior claims and NCI are deducted once; additional non-operating asset recognition is a separate explicit policy.

NCI is a book-value proxy. Annual cash, debt and shares are frozen unless overridden. Subsequent distributions, buybacks, financing, dilution and changes in investment fair value are not automatically bridged.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Historical financial appendix

USD million	2023-01-29	2024-01-28	2025-01-26	2026-01-25

Ordinary shares million	2,466.0	24,643.0	24,477.0	24,304.0

Periods retain their fiscal dates and source definitions. Historical share units may retain pre-split observations and are not used to infer per-share growth. Unavailable fields are missing observations, not factual zero balances.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Method evidence and limitations

FCFF discounts operating cash flows at WACC; financial claims enter the equity bridge. Terminal cash flow normalizes reinvestment using growth / stable ROIC. WACC must exceed perpetual growth. The chart compares scenario values with a dated close, not a future price path.

Source ID	Kind / host	Retrieved
S1	secondary_public_feed / query1.finance.yahoo.com	2026-10-03
S2	secondary_public_feed / query1.finance.yahoo.com	2026-10-03
S3	official_sec / efts.sec.gov	2026-10-03
S4	official_sec / data.sec.gov	2026-10-03

SEC tags are selected by matching period and annual duration. Unmatched fields remain explicitly marked secondary; custom XBRL tags are not guessed.

Secondary financial feeds are not independently verified against issuer filings; publication cutoff and restatement scope require review.

Annual shares and bridge balances are frozen at the latest annual end, not assumed to be current. Corporate actions since that date require review.

Trade working capital proxy omits unavailable prepayments, contract assets and customer advances.

A report is a research draft with explicit assumptions, not a brokerage recommendation.

NCI deduction is an explicit zero-recognition assumption because the feed omitted this field; this is not proof that no minority claims exist.

Defaults are transparent scenario seeds, not analyst-validated fair-value assumptions: latest margin, capped recent growth fading to perpetual growth, historical D&A/capex ratios, 10% revenue operating reserve, 10% WACC and 12% terminal ROIC unless overridden.

Latest annual cash/debt/share balances are frozen unless explicitly overridden; subsequent dividends, buybacks, financing, dilution and interim results are not automatically bridged.

NCI is deducted at book value; unrecognized non-operating stakes, assets and senior claims may materially change value.

First future fiscal cash flow is prorated by days remaining; same-calendar-date fiscal forecasts approximate 52/53-week calendars. Stock-based compensation is not deducted separately and future dilution is not forecast.

Trade NWC uses receivables + inventory - payables - deferred revenue. Missing components are omitted; this proxy excludes other operating current balances. Vendor operating-profit definitions may include investment or finance items and require filing reconciliation before use as core EBIT.
