

Tencent Holdings Limited | HK | 00700

Financial performance and cash value

This report connects reported profitability and cash conversion with transparent reinvestment and equity-bridge assumptions. The base case gives HKD 372.11 per share, compared with the dated close of HKD 421.20. These are conditional DCF values, not an investment rating.

Key takeaways

- Latest annual revenue CNY 751,766.0 million; EBIT margin 33.1%; parent net margin 29.9%. Fiscal end 2025-12-31.
- Parent ROE 21.1%; CFO / parent profit 1.35x. Scope-matched average parent equity supports the DuPont identity.
- Dated close HKD 421.20 on 2026-10-02. FX 1.168400 HKD per CNY, dated 2026-10-02.
- Bull HKD 494.73, base HKD 372.11, bear HKD 262.39 per share; base upside / downside -11.7%.
- WACC 10.0%; perpetual growth 2.0%; stable ROIC 12.0%; terminal / EV 74.7%. Operating reserve CNY 75,176.6 million is an explicit assumption.

Financial feeds, operating-profit definitions and forecast assumptions require issuer-filing review. The report does not establish verified fair value. Annual balances and shares are frozen; subsequent distributions, financing and dilution are not automatically bridged.

Public-data research draft

Observed figures and calculated values are distinguished from generic scenario assumptions. No assured target price is assigned.

Security / valuation	Value
Ticker	00700
Analysis date	2026-10-03
Dated close	HKD 421.20
Base DCF	HKD 372.11
DCF / close	-11.7%
Bear / bull	262.39 / 494.73
WACC / g	10.0% / 2.0%
Terminal / EV	74.7%

Snapshot dates

Annual anchor 2025-12-31; stock close 2026-10-02.
Reporting currency CNY; trading currency HKD.
Current balances are not implied.

Bridge proxies

Cash and recognized short investments less operating reserve, debt, senior claims and book NCI. Unrecognized long-term stakes require separate review.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Why Profitability and Cash Conversion Changed

Revenue expanded from CNY 554,552.0 million in 2022 to CNY 751,766.0 million in 2025 [F01][F04], while EBIT margin rose from 20.5% to 33.1% [F01][F04]. Parent net margin did not follow a straight path: 33.9% in 2022, 18.9% in 2023, 29.4% in 2024 and 29.9% in 2025 [F01][F02][F03][F04]. The gap between EBIT margin and parent net margin implies non-operating items, associates, taxes or non-controlling interests moved parent profit differently from operating profit, but no segment, product or management evidence is supplied to identify the driver [L01]. Parent ROE was not available for 2022, then 15.1%, 21.8% and 21.1% [F01][F04].

Cash conversion: CFO/parent profit was 0.78x in 2022, 1.93x in 2023, 1.33x in 2024 and 1.35x in 2025 [F01][F02][F03][F04]. The 2023 spike may reflect working-capital release, non-cash items or timing, but cash-flow detail is absent [L01]. The A01 NWC ratio of -9.4% is an assumption, not evidence of a cash release; release depends on the change in the NWC balance as revenue changes, and the trade proxy omits prepayments, contract assets and customer advances [A01][L01]. Annual bridge observations are in A01, but current balances and post-anchor changes are unverified [L01]. Without segment, orders or product evidence, we cannot confidently attribute changes to AI, pricing, mix, demand or cost controls [L01]. Evidence to distinguish: segment margins, product-level gross margin, operating expense breakdown, working-capital detail, cash-flow reconciliation and management guidance.

Evidence and calculation references

[F01] to [F04] identify chronological annual periods in the appendix.

[C01] Calculated DCF values and price comparison. [A01] Explicit assumptions and equity bridge.

[X01] Dated currency conversion. [L01] Source, accounting and model limitations. Full field references are retained in the evidence package.

How Cash Allocation, Reinvestment and Valuation Assumptions Affect Value

The annual bridge shows cash of CNY 141,041.0 million, investments of CNY 285,712.0 million, an operating cash reserve of CNY 75,176.6 million, debt of CNY 406,399.0 million and NCI of CNY 86,913.0 million, with shares at 9,032.821 million [A01]. These frozen annual balances are not current amounts; dividends, buybacks, financing, dilution and interim results since the balance date are not bridged [L01]. Cash allocation and reinvestment therefore matter through the base assumptions: revenue growth of 13.9%, EBIT margin of 33.1% and WACC of 10.0% [A01]. Bull and bear scenarios adjust growth, margin, capex and NWC by the stated points, terminal margins following each case [A01]. Scenario values are assumptions, not probabilities or forecasts of share-price paths.

In C01, the base DCF value is HKD 372.11/share against a close of HKD 421.20/share, base upside -11.7%; bull and bear values are HKD 494.73/share and HKD 262.39/share [C01]. Terminal EV is 74.7% of value and the net bridge is HKD -18.33/share, so terminal assumptions and bridge items-debt, NCI and operating reserve-are material [C01]. Reporting is CNY while quotes are HKD, with a conversion rate of 1.168400 on 2026-10-02 [X01]. NCI is deducted at book value, not fair value; unrecognized non-operating stakes and senior claims may change value [L01]. The DCF discount is not proof that the market price is too high given frozen balances, omitted investments, unverified post-anchor distributions, dilution and cutoff limits [L01].

Evidence and calculation references

[F01] to [F04] identify chronological annual periods in the appendix.

[C01] Calculated DCF values and price comparison. [A01] Explicit assumptions and equity bridge.

[X01] Dated currency conversion. [L01] Source, accounting and model limitations. Full field references are retained in the evidence package.

Issuer scope and reporting comparability

The selected security is Tencent Holdings Limited, HK 00700. The report uses 4 annual observations; it does not substitute a parent group or another listing.

SEC-matched periods use actual filing fiscal ends. Other observations retain the vendor period and source status. Publication cutoffs, restatements, mergers and accounting definitions require issuer reconciliation; no uninterrupted economic perimeter is inferred from availability alone.

Parent-attributable profit and average parent equity are matched for ROE. Consolidated operating cash flow / parent profit is a diagnostic comparison, not a scope-matched accounting identity.

Issuer identifiers

Tencent Holdings Limited

Version discipline

Snapshots retain original values, field references, URL provenance and response hashes. Missing data stays unavailable. Source status is not upgraded merely because arithmetic passes.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Profitability cash conversion and DuPont

Profit margin, cash conversion and balance-sheet returns answer different questions. Parent ROE uses parent-attributable profit and average parent equity; the three-factor identity uses matching balances throughout. Missing opening balances remain unavailable.

Metric	2022-12-31	2023-12-31	2024-12-31	2025-12-31
Revenue growth	Not available	9.8%	8.4%	13.9%
EBIT margin	20.5%	27.2%	31.6%	33.1%
Parent net margin	33.9%	18.9%	29.4%	29.9%
CFO / parent profit	0.78x	1.93x	1.33x	1.35x
Parent ROE, average equity	Not available	15.1%	21.8%	21.1%
Asset turnover	Not available	0.39x	0.39x	0.39x
Assets / parent equity	Not available	2.06x	1.88x	1.80x
DuPont reconciliation	2022-12-31	2023-12-31	2024-12-31	2025-12-31
Direct parent ROE	Not available	15.1%	21.8%	21.1%
Three-factor product	Not available	15.1%	21.8%	21.1%
Absolute identity error	Not available	0.00e+00	0.00e+00	2.78e-17

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Five year operating forecast

Forecasts are explicit assumptions, not management guidance. The model projects the issuer in aggregate; there is no verified segment, product or order forecast in this packet. The first annual FCFF is prorated to the days remaining after the analysis date.

Base drivers / forecast	2026E	2027E	2028E	2029E	2030E
Revenue	855,957.8	954,287.5	1,041,278.1	1,111,500.2	1,160,094.1
EBIT margin	33.1%	33.1%	33.1%	33.1%	33.1%
EBIT	283,245.1	315,783.4	344,569.5	367,806.7	383,886.9
Operating tax rate	17.1%	17.1%	17.1%	17.1%	17.1%
D&A	75,179.2	83,815.6	91,456.0	97,623.6	101,891.7
Capex	128,525.9	143,290.5	156,352.5	166,896.7	174,193.3
Trade NWC proxy	-80,461.2	-89,704.3	-97,881.5	-104,482.5	-109,050.4
Full year FCFF	191,218.5	211,508.9	228,881.1	242,188.7	250,455.3

Initial growth 13.9% fades toward perpetual growth. Historical D&A / revenue 8.8%, capex / revenue 15.0% and trade NWC / revenue -9.4% are mechanical drivers unless explicitly overridden. Vendor EBIT requires accounting reconciliation before interpretation as core operating profit.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

DCF comparison | Three operating scenarios

BASE DCF HKD 372.11

FCFF / WACC as of 2026-10-03. Five explicit years and normalized terminal reinvestment.

DCF values as of 2026-10-03; comparison only, no price path or probabilities.

Connections compare values with the dated close. No price path or scenario probability is assigned.

Shared valuation inputs

Assumption	Value
WACC	10.0%
Perpetual growth	2.0%
Stable ROIC	12.0%
Stable tax	17.1%
Base stable margin	33.1%
TV / EV	74.7%

WACC and stable ROIC are explicit assumptions. Terminal share measures sensitivity; it does not validate forecast accuracy.

Operating cases

BULL HKD 494.73

DCF / close 17.5%

Growth is base plus 5 percentage points; margin plus 2 points and NWC ratio minus 1 point.

2030E revenue 1,451,683.8m; EBIT margin 35.1%. Stable margin 35.1%.

BASE HKD 372.11

DCF / close -11.7%

Recent growth fades toward perpetual growth. Margin, D&A and reinvestment ratios follow the disclosed base assumptions.

2030E revenue 1,160,094.1m; EBIT margin 33.1%. Stable margin 33.1%.

BEAR HKD 262.39

DCF / close -37.7%

Growth is base minus 5 points; margin minus 3 points, capex ratio plus 0.5 point and NWC ratio plus 2 points.

2030E revenue 917,354.3m; EBIT margin 30.1%. Stable margin 30.1%.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Annual FCFF = NOPAT + D&A - capex - change in trade NWC. The first fraction and actual/365 discount factor are shown explicitly. Stable FCFF = normalized NOPAT x (1 - growth / ROIC). Amounts stay in CNY; only per-share outputs are translated.

Equity bridge and sensitivity

Base bridge CNY mm	Amount	WACC / g	1.0%	1.5%	2.0%	2.5%	3.0%
Operating EV	3,018,477.2	9.0%	413.03	420.71	429.30	439.04	450.20
Cash	141,041.0	9.5%	386.44	392.30	398.79	406.04	414.23
Investments	285,712.0	10.0%	362.83	367.26	372.11	377.45	383.39
Operating Cash Reserve	75,176.6	10.5%	341.72	345.02	348.58	352.43	356.66
Debt	406,399.0	11.0%	322.75	325.14	327.67	330.37	333.26
Other Senior Claims	0.0						
Nci	86,913.0						
Non Operating Assets	0.0						
Shares	9,032.821385						
Equity value	2,876,741.6						
HKD / share	372.11						

Sensitivity in HKD/share. Centre equals the base model. Other operating and bridge assumptions are held fixed.

Reporting currency CNY; quoted currency HKD. Conversion uses 1.168400 HKD per CNY, dated 2026-10-02.

Cash and recognized short investments enter the bridge after the operating reserve. Debt, senior claims and NCI are deducted once; additional non-operating asset recognition is a separate explicit policy.

NCI is a book-value proxy. Annual cash, debt and shares are frozen unless overridden. Subsequent distributions, buybacks, financing, dilution and changes in investment fair value are not automatically bridged.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Historical financial appendix

CNY million	2022-12-31	2023-12-31	2024-12-31	2025-12-31
Revenue	554,552.0	609,015.0	660,257.0	751,766.0

Ordinary shares million	9,568.7	9,391.2	9,142.2	9,032.8

Periods retain their fiscal dates and source definitions. Historical share units may retain pre-split observations and are not used to infer per-share growth. Unavailable fields are missing observations, not factual zero balances.

Sources: frozen public financial feeds and matched SEC tags where available. Secondary fields require filing review. Amounts are reporting-currency millions unless stated.

Method evidence and limitations

FCFF discounts operating cash flows at WACC; financial claims enter the equity bridge. Terminal cash flow normalizes reinvestment using growth / stable ROIC. WACC must exceed perpetual growth. The chart compares scenario values with a dated close, not a future price path.

Source ID	Kind / host	Retrieved
S1	secondary_public_feed / query1.finance.yahoo.com	2026-10-03
S2	secondary_public_feed / query1.finance.yahoo.com	2026-10-03
S3	secondary_public_feed / datacenter.eastmoney.com	2026-10-03
S4	secondary_public_feed / query1.finance.yahoo.com	2026-10-03

Secondary financial feeds are not independently verified against issuer filings; publication cutoff and restatement scope require review.

Annual shares and bridge balances are frozen at the latest annual end, not assumed to be current. Corporate actions since that date require review.

Trade working capital proxy omits unavailable prepayments, contract assets and customer advances.

A report is a research draft with explicit assumptions, not a brokerage recommendation.

Defaults are transparent scenario seeds, not analyst-validated fair-value assumptions: latest margin, capped recent growth fading to perpetual growth, historical D&A/capex ratios, 10% revenue operating reserve, 10% WACC and 12% terminal ROIC unless overridden.

Latest annual cash/debt/share balances are frozen unless explicitly overridden; subsequent dividends, buybacks, financing, dilution and interim results are not automatically bridged.

NCI is deducted at book value; unrecognized non-operating stakes, assets and senior claims may materially change value.

First future fiscal cash flow is prorated by days remaining; same-calendar-date fiscal forecasts approximate 52/53-week calendars. Stock-based compensation is not deducted separately and future dilution is not forecast.

Trade NWC uses receivables + inventory - payables - deferred revenue. Missing components are omitted; this proxy excludes other operating current balances. Vendor operating-profit definitions may include investment or finance items and require filing reconciliation before use as core EBIT.
